

#1941

# 66" OD x 16' Sweet 720psi Horizontal Separator

*FOR IMMEDIATE SALE*

Located in PACE's trucking yard in Nisku and is ready for immediate shipment. This 66" x 16' sweet service separator is dressed 3 phase, complete with water boot. Gas flow control is done by the inlet controller (the positioner is missing). Dump valves on this unit are controlled by level controllers to the dump valve. The vessel LSHH is a Murphy L1200. The package is fully wired, include indoor/outdoor lighting, two exhaust fans, gas detection, ESD valve, ESD buttons outside of each door, beacon in building, and AC lit cata-dyne style heaters. Internal inspection documents and UT data are available.

**FOR IMMEDIATE SALE**
